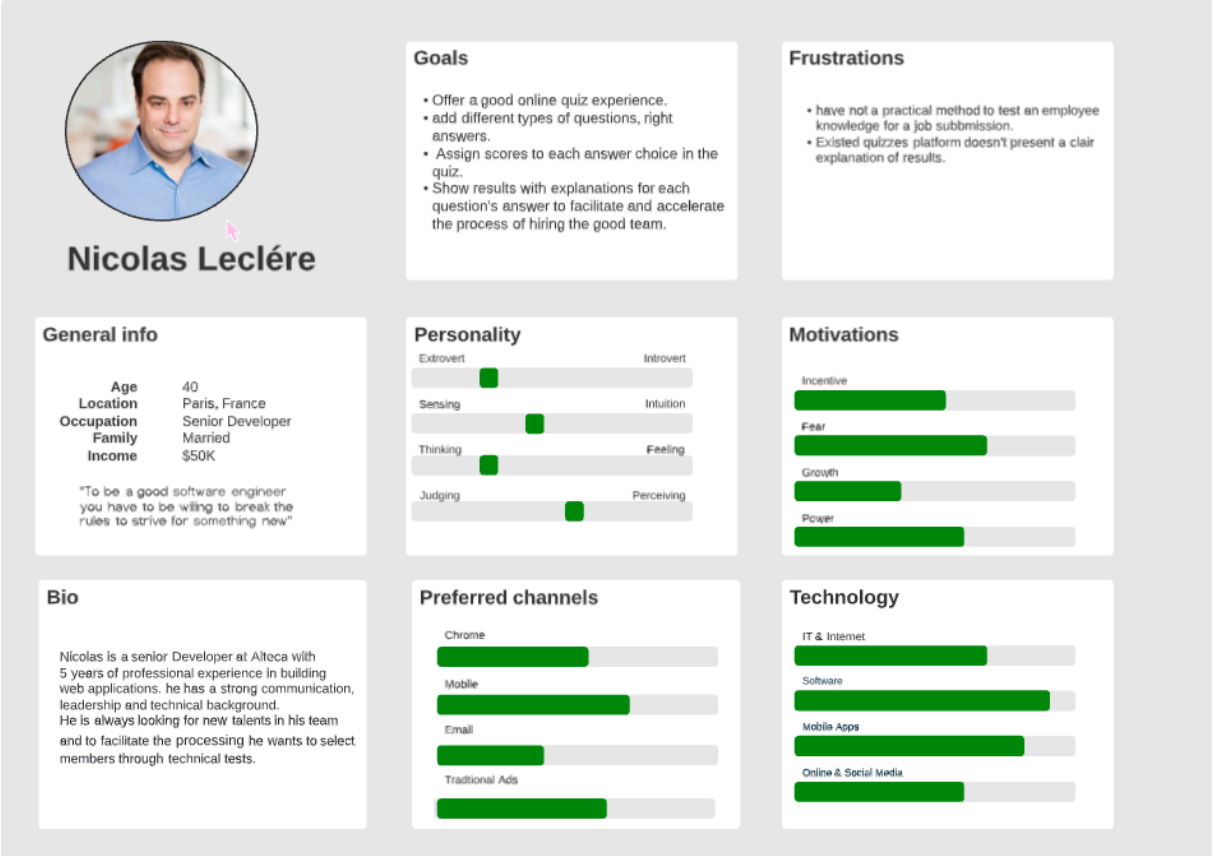
1- Personas



Nicolas Leclére
Goals
• Offer a good online quiz experience.
• add different types of questions, right answers.
• Assign scores to each answer choice in the quiz.
• Show results with explanations for each question's answer to facilitate and accelerate the process of hiring the good team.
Frustrations
• have not a practical method to test an employee knowledge for a job subbmission.
• Existed quizzes platform doesn't present a clair explanation of results.

"How do I know I've learned."
Age: 23
Work: Undergraduate student
Family: single.
Location: Paris, France
Character: IT Enthusiast
Bio
Peter is a computer science student at EPITA School of Engineering and Computer.
He likes to find out about new things, so in his spare time he learn new technologies and try always to find quizzes to test his knowledge and verify his understanding.
Goals
• Get good grades on tests to get a job.
• Good quality materials accessible from home, library or campus via LMS.
• Information presented in a concise way to minimise reading.
• See results and check score after submitting to verify whether my knowledge was good enough to pass.
Frustrations
• Doing assignments that have no obvious relevance to the theme (waste of time).
• Get a score without explanation of how it was calculated.
• Lengthy texts.

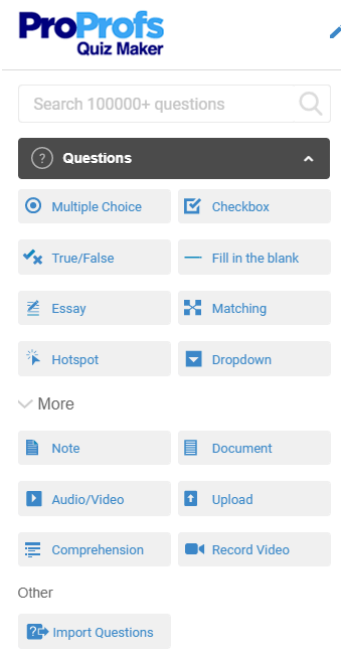
		As a quiz taker I want to see an error message if the username has been taken so that I can change my username before registration.	
		As a quiz taker I want to see an error message if the password is not secured enough so that I can change my password before registration.	
		As a quiz taker I want to be able to log in with my username and password so that the system can authenticate me and I can trust it	
		As a quiz taker I want to occasionally change my password so that I can keep it secure.	
		As a quiz taker I want to request a new password so that I don't permanently lose access to my data if I forget it.	
	As an administrator I want to manage user's profile so that I can update the accounts.	As an administrator I want to see the list of users so that I can manage their profile.	
		As an administrator I want to enter users into the system so that I can complete the assignment of the required roles, facilities, and programs to each user.	
		As an administrator I want to reset a user's password so that I can support a user's access.	
		As an administrator I want to delete a user so that I can block his access.	
		As an administrator I want to edit user's details so that I can update the system to reflect changes.	
	As a guest I want to access to the home page so that I can be a registered user.	As a guest I want to see the home page so that I can register to the system.	
		As a guest I want to see the home page so that I can make contact with the administrator.	

Build the quiz platform	As a company I want to access to the quizzes created by my employees so that I can manage them.	As a company I want to see the list of quizzes so that I can follow the statistics of quizzes.	
		As a company I want to change the type (public/private) of a quiz so that I can publish the quiz with other companies.	
		As a company I want to create a quiz so that I can add questions and save them.	
		As a company I want to delete a quiz so that after checking I can remain only the suitable quizzes.	
	As a quiz maker I want to create a quiz page so that I can add questions and save them without publishing.	As a quiz maker I want to access to the quizzes of the company so that I can pick a quiz and edit it for my needs.	
		As a quiz maker I want to add the question, possible answers, correct answers, explanation, duration and the question value so that I can test the quiz taker knowledge.	
		As a quiz maker I want to make the type of a quiz as private so that I can publish the quiz with the company or as public so that the quiz will be published with others companies.	
		As a quiz maker I want to edit a question or answer, so that I can or delete a mistake.	
		As a quiz maker I want to delete a question or answers, so that only the suitable questions remain for the quiz.	
		As a quiz maker I want to see an error message if a question must have correct answers and I forget to add them so that the quiz will be correct.	
		As a quiz maker I want to publish the quiz only once it is fully created so that it only appears to quiz takers when it is ready.	
		As a quiz maker I want to see the results of quiz taker's submission so that I can see the follow-up of the quiz.	

Build the quiz platform	As a quiz taker I want to open the quiz page so that I can see the questions I have to answer.	As a quiz taker I want to choose answers and submit the quiz so that I can test my understanding.	
		As a quiz taker I want to see my results after I submit so that I can verify whether my knowledge was good enough to pass.	
		As a quiz taker I want to see explanations for all questions, including an indication of ideal answers beside every question so that I can learn from the questions I got wrong.	
		As a quiz taker I want to see my results when I have passed the test, if I revisit the quiz page later so that I can check my score and to avoid attempting a quiz that I have already passed.	



3- Online quiz makers:

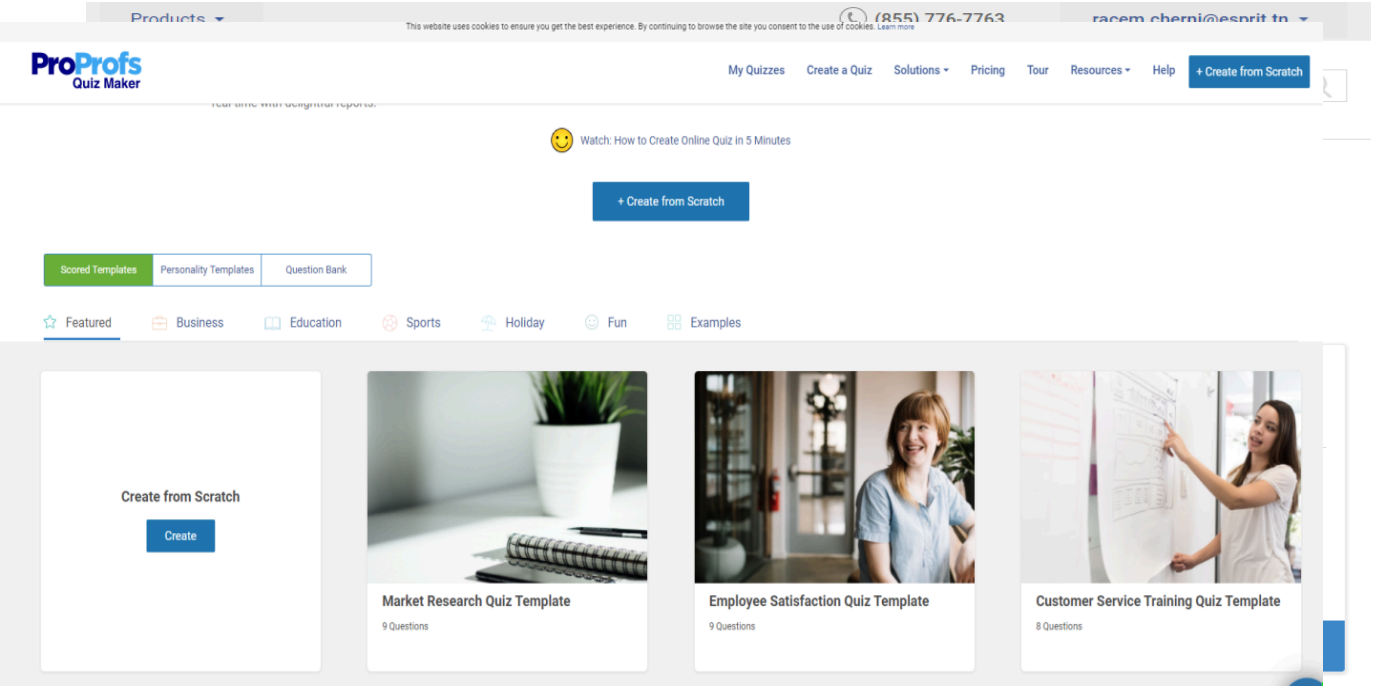
- **ProProfs :** is cloud-based software to create and deliver online exams and tests. The ProProfs solution helps you to author quizzes, secure tests and student/employee assessments. It comes along with complimentary test templates, automated grading and integration with ProProfs LMS.

Features:

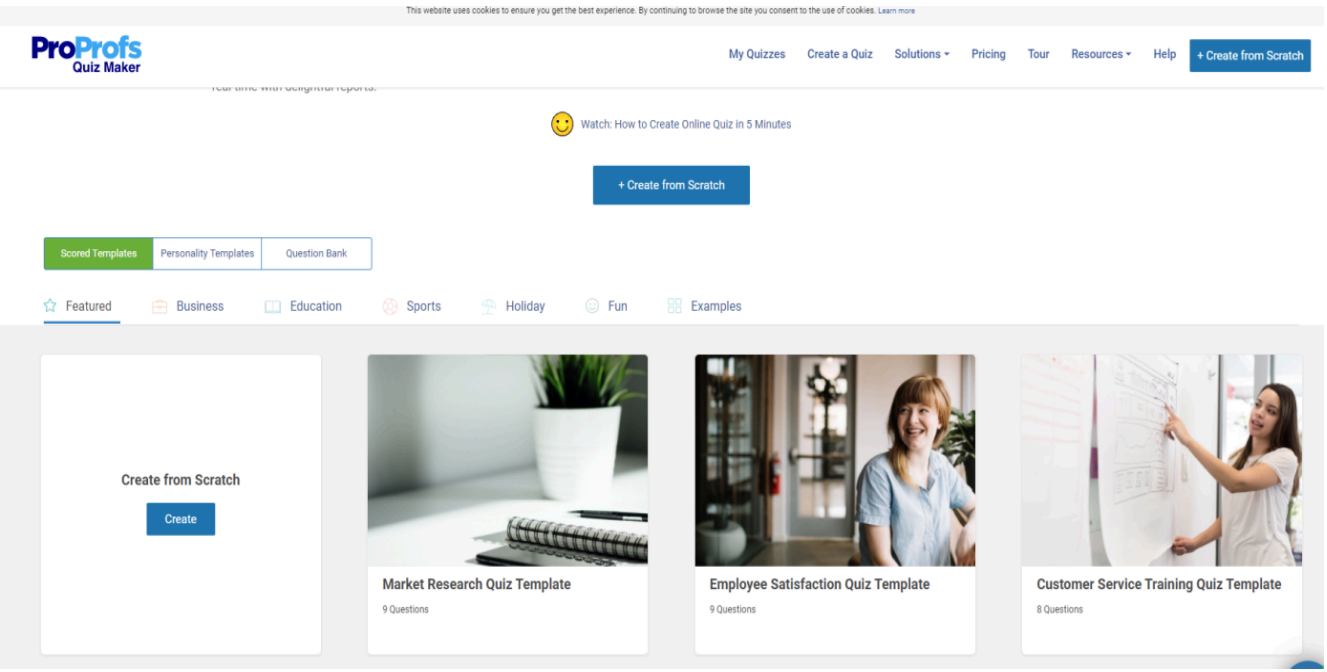
- Allows you to make a test using existing templates or create your own from scratch
- User-friendly drag-and-drop interface
- You can save time with automatic grading
- Create any quiz you like: true or false, multiple choice, matching, personality quiz, polls, fill in the blanks, checkboxes.

Steps to make quiz:

- Choose a quiz type



- Choose a template or make from scratch



- Choose questions and add images & videos

What is the definition of Market Research?

- The systematic and objective process of generating information to aid in making marketing decisions
- The system of finding the correct answers to our objectives
- Market Intelligence
- All of the above
- None of the above

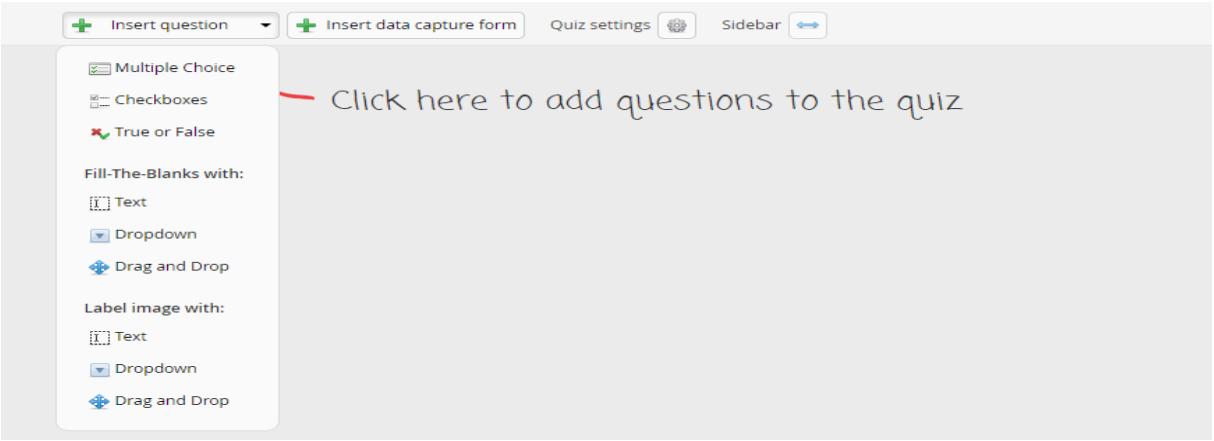
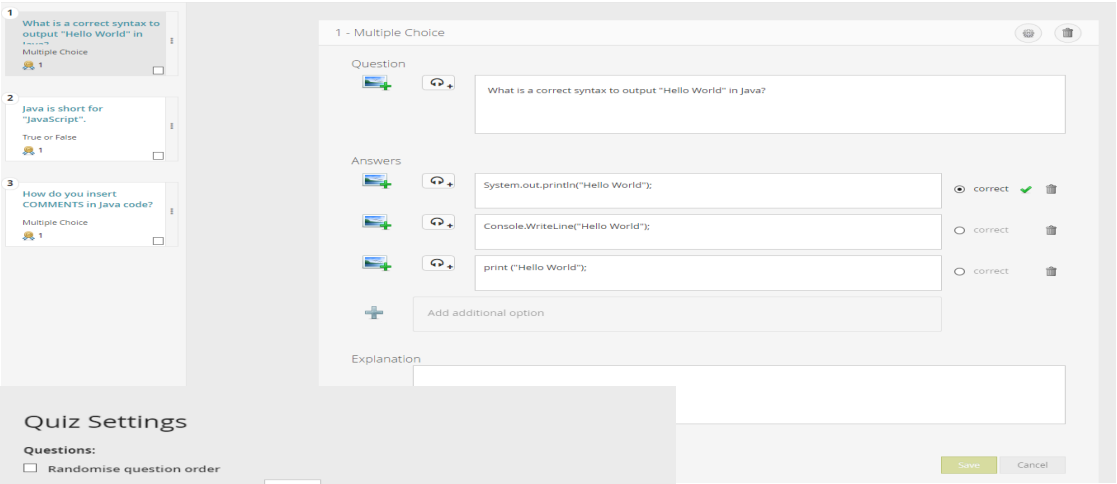
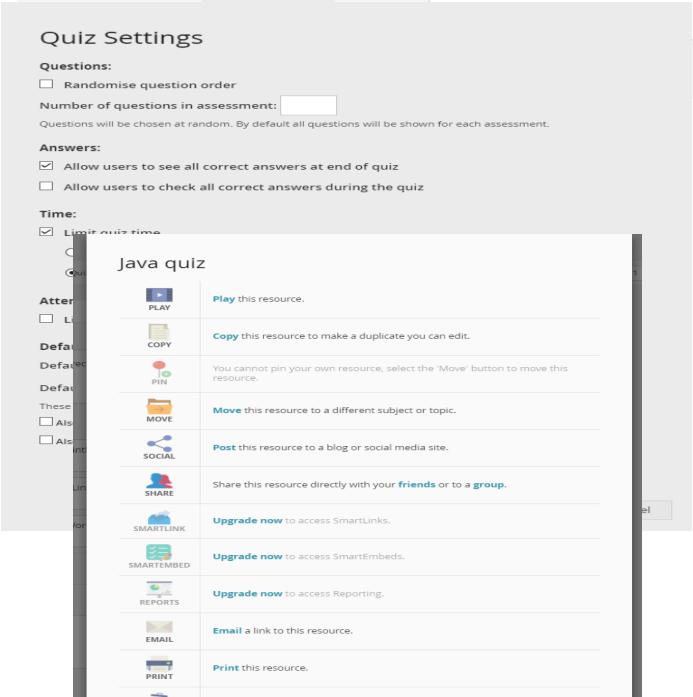
- Select any quiz you like: true or false, multiple choice, matching, personality quiz, polls, fill in the blanks, checkboxes and.



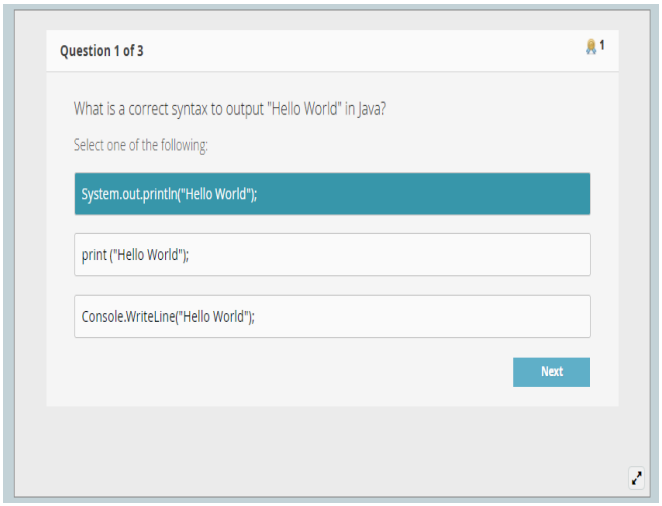
- Add a question, answers, correct answers and explanation.

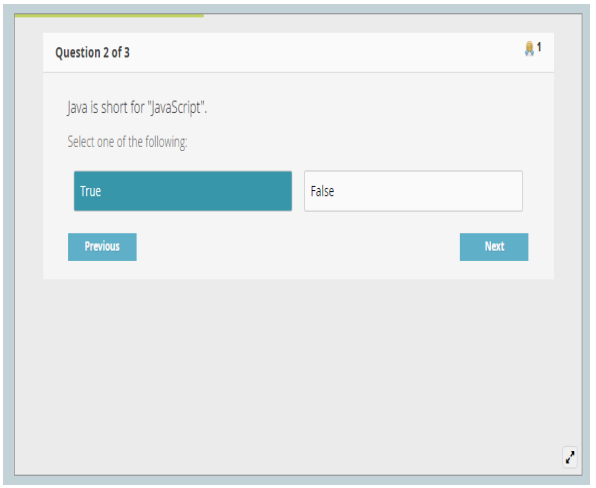




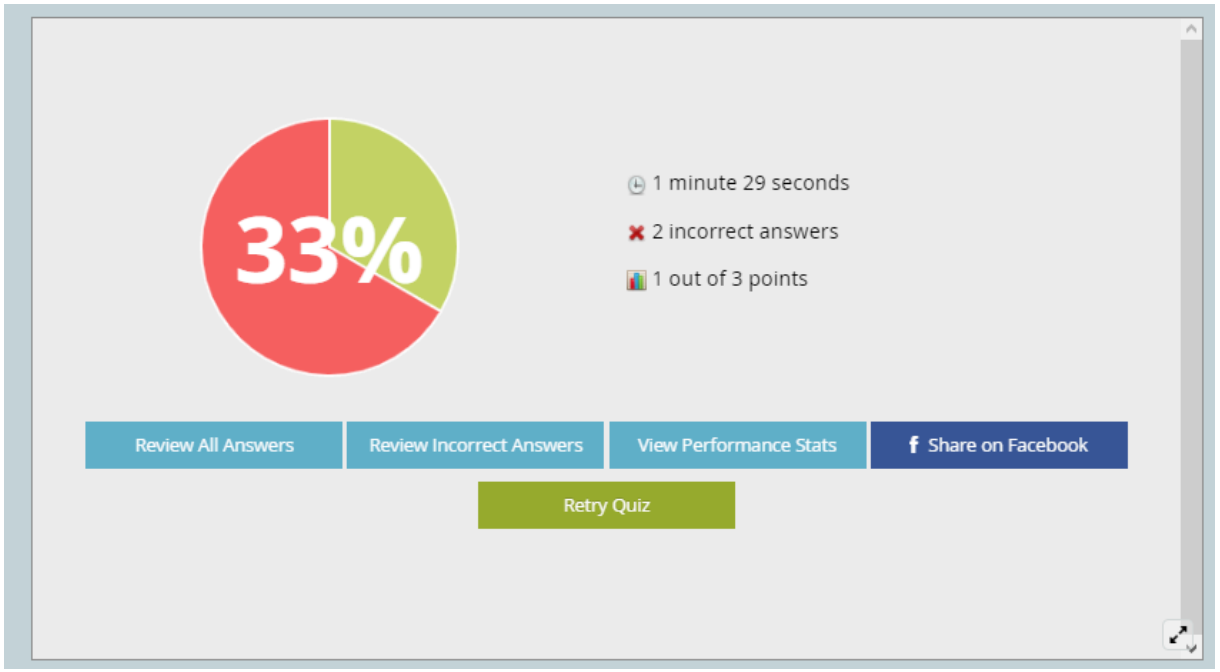
- Configure the settings (limit quiz time,…) - Lead generation (link, email, social,…)

- Preview the quiz.





- View result (score, duration, number of incorrect answers).



- **Eval&GO**

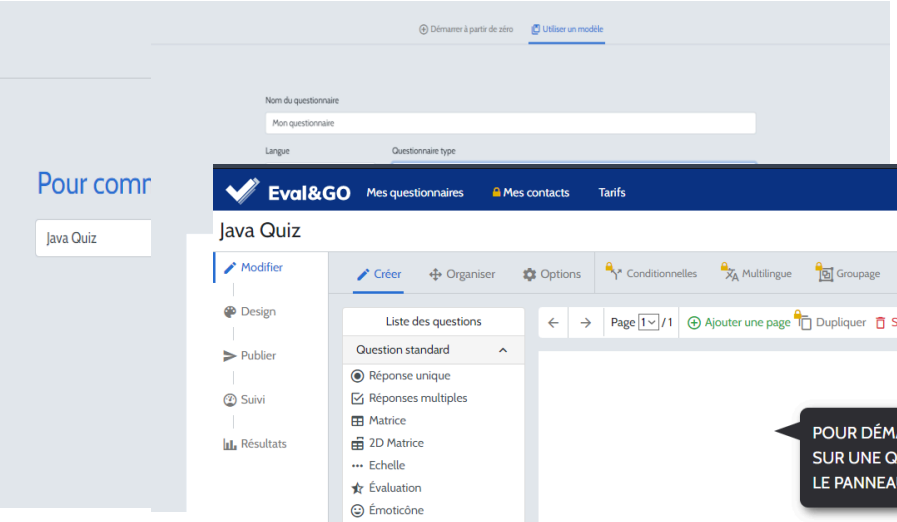
<u>Features:</u>

- Creation of questions Single choice, open text, form, matrix ... dozens of types of configurable questions are available to create your satisfaction survey for example. It is also possible to choose questions from a library.

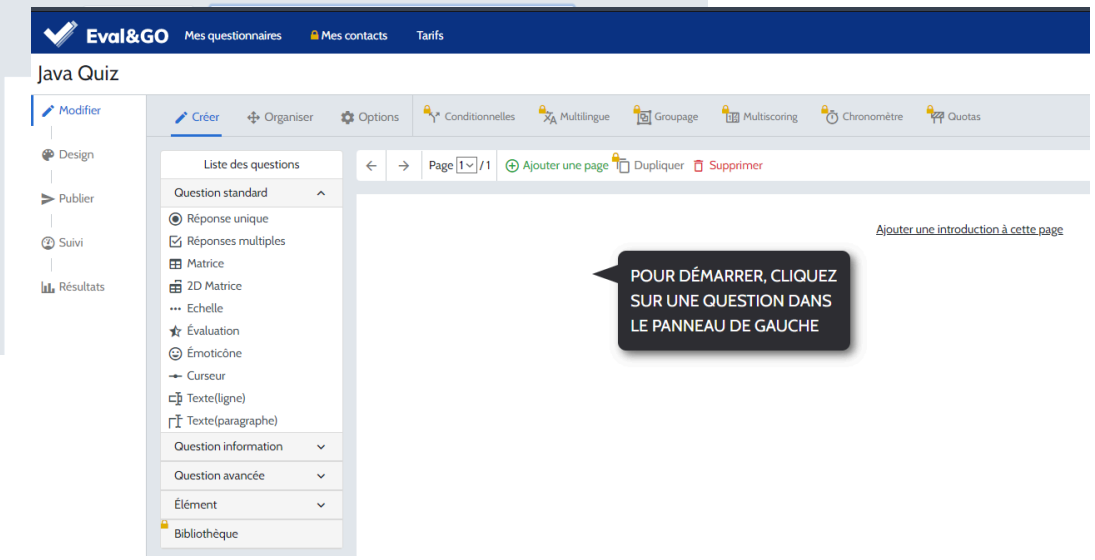
- Personalization of the questionnaire: The questions can be conditioned and organized among themselves according to a scenario.
- Publication: Send your questionnaires by email, publish them using an anonymous link or integrate them into your website. You can follow in real time the number of respondents to your questionnaires thanks to tracking graphs. Eval&GO integrates perfectly with all your media as if the questionnaires were designed by you and for you.
- Analysis of the results: You have access to a fully customizable automatic report which allows you to break down your results (as part of a market study for example). It is then possible to export this report in many formats or share it online.

Steps to create a quiz:

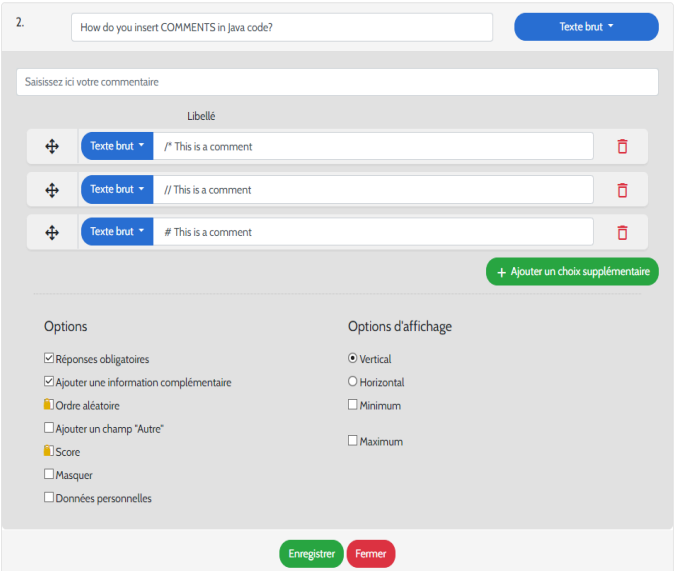
- Select quiz type (using a model or from scratch).

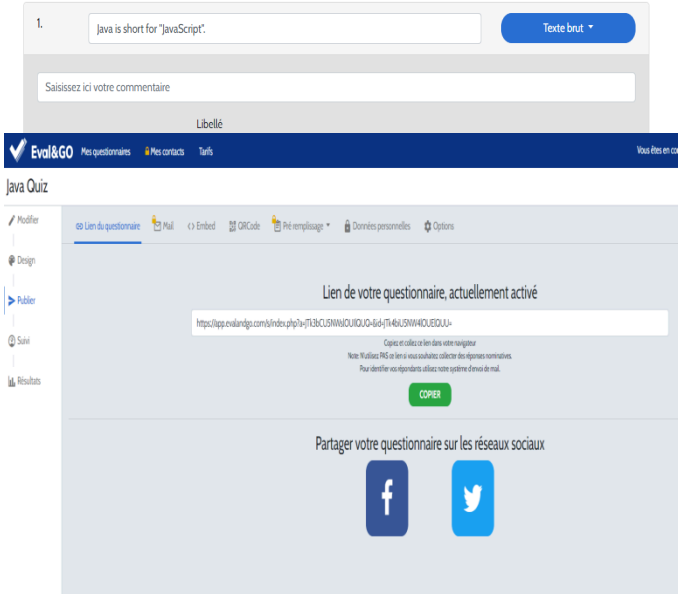


- Select any quiz you like: true or false, multiple choice, matching, personality quiz, polls, fill in the blanks, checkboxes.



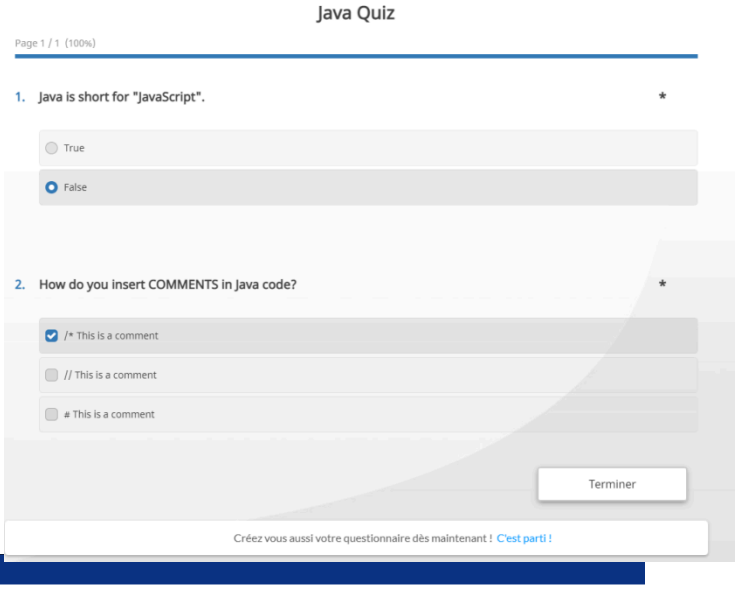
- Add a question, answers, correct answers and explanation.

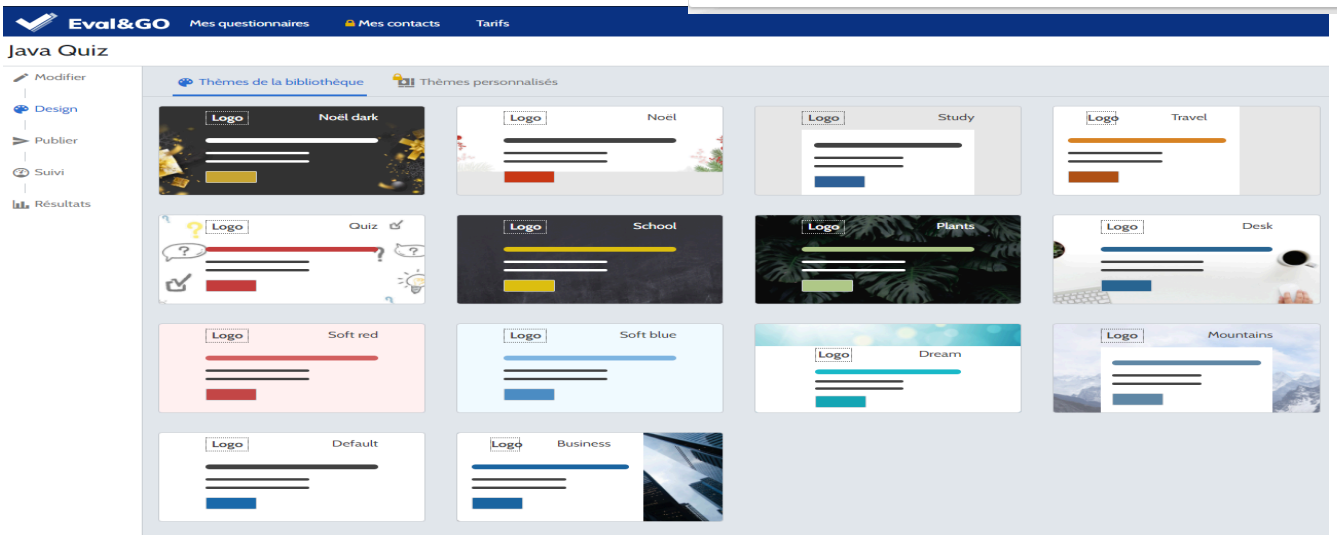




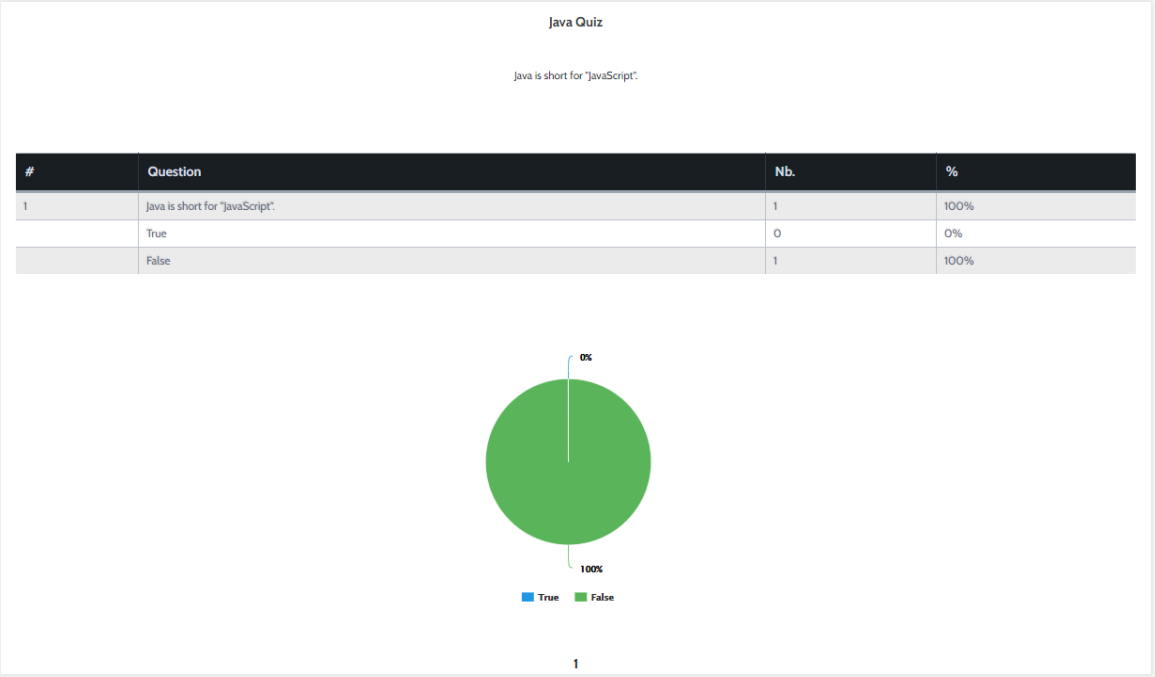
- select the design.

- Preview and publish the quiz.





- View the results.



Java Quiz

Java is short for "JavaScript".
